

Enterprise Resource Planning (ERP)

We're working to make the tasks you complete each day simpler and more efficient. Soon, you'll just have to access one platform to accomplish and/or approve many of the things that now take several different logins. Staff changes, invoices, supply orders, financial reports, paystubs, and scheduling time off – can all be checked off your list in the very same spot!

What's happening when?

Version 2: Now with new dates and changes to involved ministries.

Date	Involved Ministries	Areas Going Live

February 1, 2020	CHRISTUS Trinity Mother Frances CHRISTUS Trinity Clinic	Finance, Supply Chain
March 1, 2020	CHRISTUS St. Vincent CHRISTUS Good Shepherd ASPG	Finance, Supply Chain

Enterprise Resource Planning (ERP)

There are so many other ways this project will make tasks simpler and more efficient, and you'll have easy access to all of them. Here are just a few examples!

Finance

On your dashboard, you can also find your financial information with the ability to drill all the way down to transaction details and support.

Supply Chain

We'll be issuing hand-held, wireless devices for Associates to utilize in signing and receiving packages, providing us with real-time data and with the ability to auto receive large batches of products. And ordering products will be as simple as shopping online, complete with pictures and without pages to scroll through.

Human Resources/Payroll

HR processes and forms will all be housed in one place so that we can be sure we're all taking the standardized, approved approach, reducing risk. Managers and Associates will have more self-service capabilities on any computer or mobile device including viewing and editing detailed information. Update your profile information including education and credentials, manage your goals and access your paycheck information all in the same place.

Job candidates' experiences will be improved, too, as they'll have real-time access to their application status. And the application process will be a faster one as simply uploading their resume will automatically populate fields.

Workforce Management

Our new integrated workforce management system will provide us with new time capture and scheduling capabilities. You'll be able to complete tasks in one system, from the convenience of your mobile device, like reviewing your timecard, submitting time adjustments, requesting PTO and confirming an available shift. Managers will also be able to customize their dashboard so only the most relevant information is included and tasks are top of mind.
